

Option icons App

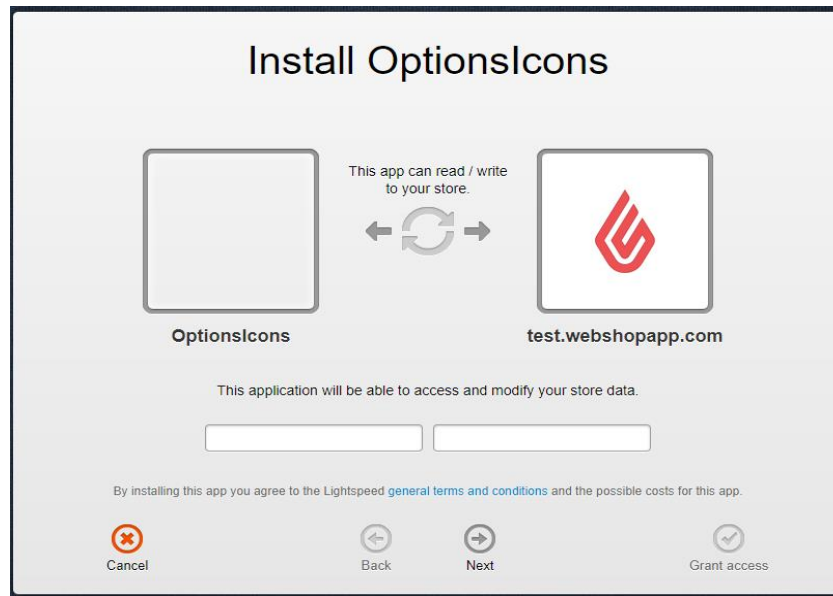

CMDC

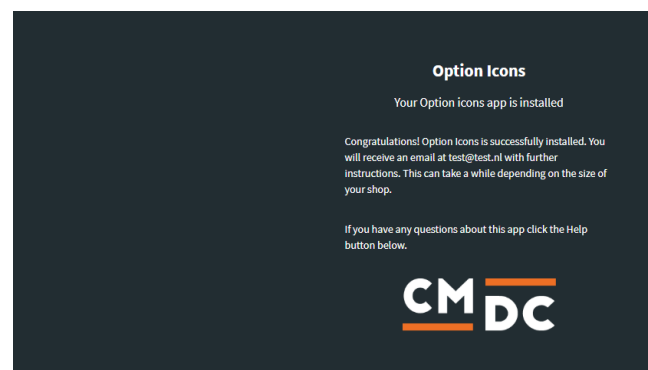

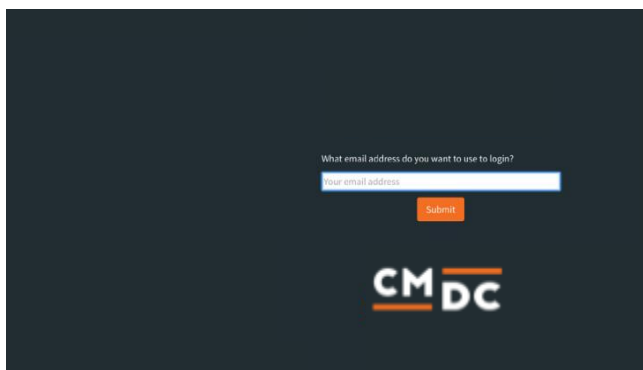

Step 1. Installing the Option icons APP

Search the Appstore for the app.

If you want to install the app, click on the “install” button and follow the guided installation steps.

When the app is installed, you'll be redirected to the page shown below, where you can enter the e-mail address of the user that will use the app. As soon as you've entered your email address, we'll continue the installation process in the background and we'll let you know when the installation is done. If it's your first app by CMDC, we'll also include your password in the confirmation email.

NOTE: Depending on the amount of products you have in your shop, it might take several minutes for the email to be send.

For questions you can contact us

Or ask your question via the "Help" button.

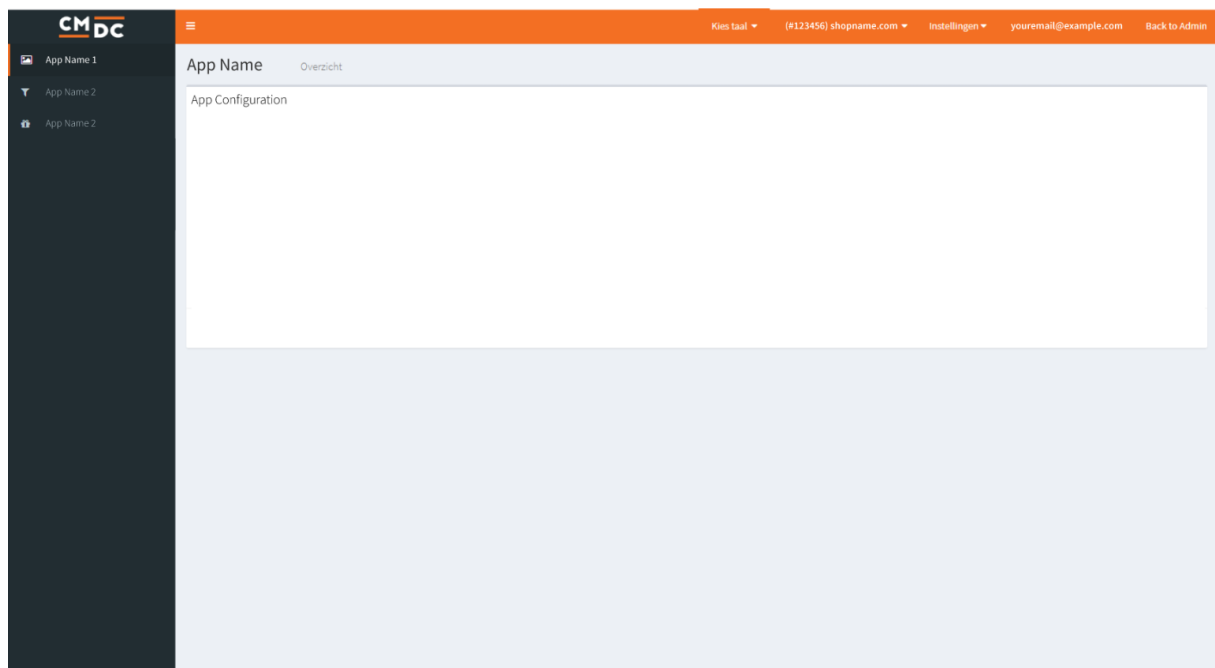

Step 2. The APP framework from CMDC

Welcome to the CMDC appframework.

CMDC has created a framework, where you'll be able to configure all the apps that are made by CMDC, which you have installed. After installing the app from Lightspeed, you'll receive an email with your password on the email address you've supplied.

Every next app of CMDC you install, while using the same email address, will be added to your menu. You'll still receive an e-mail when the installation is complete, but you'll be able to login with your same login details.

Do you own multiple shops? No problem, you can still add all the apps to the different stores using the same email address. You'll then be able to switch shop and language. By clicking on your email address you'll be able to change your password.

Or ask your question via the "Help" button.

Step 3. Adding and customizing the Option icons APP

Option icons is an app where you can upload an image for an option and the app will put this image in front of the option.

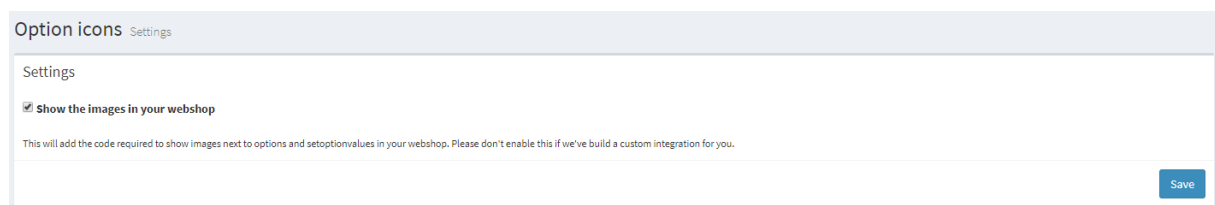

Note: don't use icons or images bigger than 42px X 32px

Settings

When you navigate to the Options icons app in the appframework the first page you will see is the Settings page.

You will see a checkbox with **"Show images in your webshop"** next to it. When you activate this option the app will automatically add the icons in front of the option.

NOTE: If you have a custom integration of the app don't activate this option.

Option icons Settings

Settings

☒ Show the images in your webshop

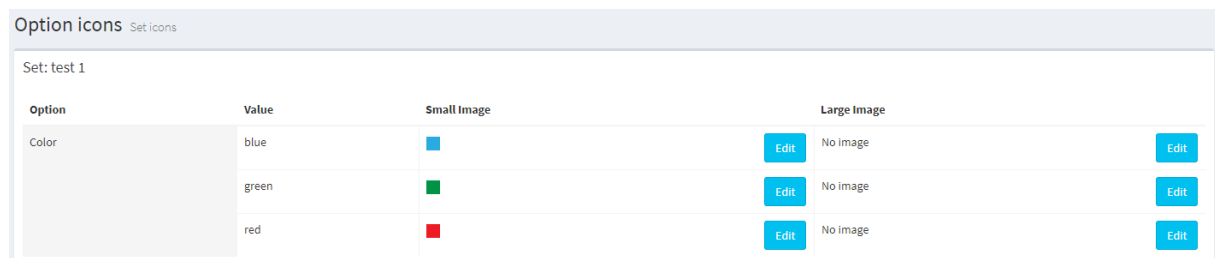

This will add the code required to show images next to options and setoptionvalues in your webshop. Please don't enable this if we've build a custom integration for you.

Save

By Set

If you use product sets in your webshop you can upload icons for all the options on this page.

When you navigate to the page you will see all the options of each product set. For each option you can upload a small image and a large image. To upload an image you click the **"Edit"** button.

Option icons Set icons

Set: test 1

Option	Value	Small Image	Large Image
Color	blue		 No image 
	green		 No image 
	red		 No image 

When you click on the **"Edit"** button a popup will appear. In this popup you can choose an image you want to upload. Choose the image, and click on the button **"Use image chosen above"** to confirm you want to use this image as an icon for this option.

You can also click on the **"Cancel"** button to close the popup.

If you already uploaded an image for this option you can delete this image by clicking on the “**Delete current image**” button.

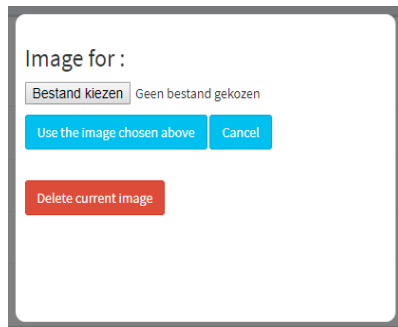

A modal window titled "Image for :". It contains a button labeled "Bestand kiezen" with the text "Geen bestand gekozen" next to it. Below this are two buttons: "Use the image chosen above" and "Cancel". At the bottom is a red button labeled "Delete current image".

Image for :

Bestand kiezen Geen bestand gekozen

Use the image chosen above Cancel

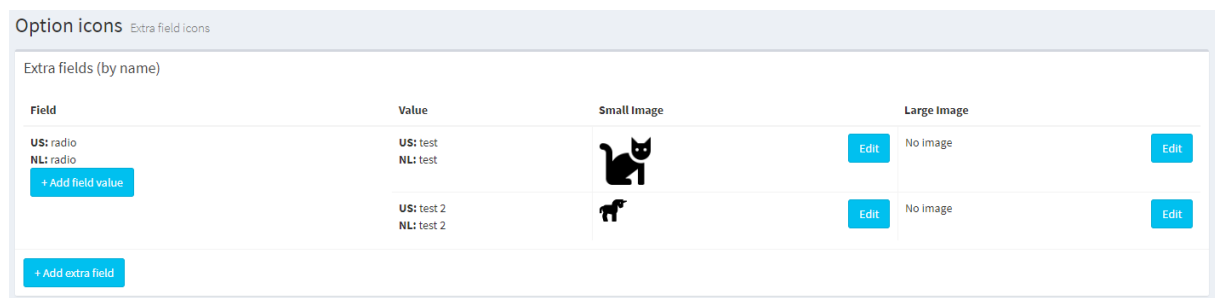

Delete current image

NOTE: If you use the automatic integration of the app only the small images will be used. don't use icons or images bigger than 42px X 32px

By Custom Field

If you use extra fields in your webshop, you can upload icons on this page.

On this page you will see all the options for the extra fields. For each option you can upload a small image and a large image by clicking on the “**Edit**” button.

The interface shows a table of "Option icons" for "Extra field icons". The table has columns for "Field", "Value", "Small Image", and "Large Image". There are two rows of data. Each row has an "Edit" button next to the "Small Image" and another "Edit" button next to the "Large Image". At the bottom of the table is a button labeled "+ Add extra field".

Option icons Extra field icons

Extra fields (by name)

Field	Value	Small Image	Large Image
US: radio NL: radio + Add field value	US: test NL: test	 Edit	Edit No image Edit
	US: test 2 NL: test 2	 Edit	Edit No image Edit

[+ Add extra field](#)

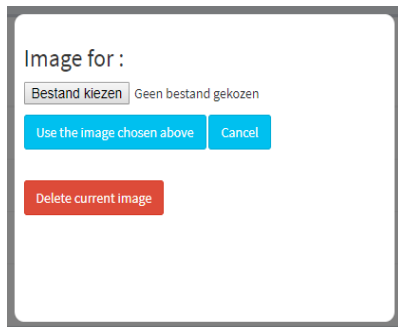

When you click on the “**Edit**” button a pop-up will appear. In this pop-up you can choose an image you want to upload. Choose the image, and click on the button “**Use image chosen above**” to confirm you want to use this image as an icon for this option.

You can also click on the “**Cancel**” button to close the popup.

Or ask your question via the "Help" button.

If you already uploaded an image for this option you can delete this image by clicking on the “**Delete current image**” button.

A screenshot of a web interface for selecting an image. It features a label "Image for :", a button "Bestand kiezen" with the text "Geen bestand gekozen" next to it, two buttons "Use the image chosen above" and "Cancel", and a red button "Delete current image".

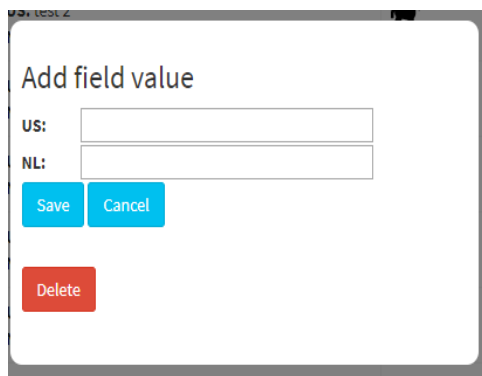

NOTE: If you use the automatic integration of the app only the small images will be used. don't use icons or images bigger than 42px X 32px

You can also choose to add extra extra fields and field values. You can use this to manually add the lightspeed extra fields and field values. Make sure that for every field and field value you add, a field and field value with the same title exists in Lightspeed.

If you want to add an option to an existing extra field click on “**Add field value**”. If you want to add a new extra field click on “**Add extra field**”.

When you add a field value or an extra field, you can enter a title per language. Make sure this title matches the title of the field value or the extra field in lightspeed. Click on the “**Save**” button to create your field value or extra field.

You can also choose to delete the field value or extra field here.

A screenshot of a dialog box titled "Add field value". It contains two input fields labeled "US:" and "NL:". Below the fields are two buttons: "Save" and "Cancel". At the bottom of the dialog is a red button labeled "Delete".

After configuring the app the icons will appear next to the options in your webshop.

A screenshot of a product configuration interface. It shows a label "Kleur: *" followed by a dropdown menu. The dropdown is open, showing four options: "blauw" (with a blue square icon), "blauw", "groen" (with a green square icon), and "rood" (with a red square icon).

Example Product sets

A screenshot of an extra field configuration interface. It shows a label "Choose an animal:" followed by two radio button options. The first option is "Cat (+€5,99)" with a cat icon. The second option is "Unicorn (+€6,99)" with a unicorn icon.
